

Advertising balloon 4 m · body of 8 panels · print template at 1:10 scale

Scale 1:10 (1 mm = 1 cm). Each panel is 330 cm long, 106 cm at its widest point and 40 cm at the bottom (to the seam). Extend the artwork to the red cutting line, 1.5 cm beyond the seam: this strip disappears into the seam. The cutting lines of neighbouring panels touch at the widest point, so draw an all-round design continuously across the whole area. Text and logos belong in the safe area 70 × 146 cm. The lower part of the panels is covered by the balloon base.

Blue dashed: seam line (panel edge on the balloon) · red solid: cutting line, the artwork extends to it (allowance 1.5 cm beyond the seam) · green dashed: safe area for the logo · light blue dashed: seam zone 5 cm · grey area: outside the cutting line, not printed · do not change the aspect ratio

Save as PDF (CMYK, Coated FOGRA39), convert the design text to curves (the VS-BALON-... labels may stay as text), images at least 400 dpi at template scale. Cover the guide lines in the panel areas with the background or remove them. Upload the file in the 3D Studio at vitasystem.eu.
